

ParkPilot Valet

Modern valet operations software for speed, visibility, and billing confidence

Product Overview

What ParkPilot Delivers

- Live vehicle lifecycle tracking: check-in, park, request, retrieve, and checkout
- Role-aware dashboards for valet operators, managers, and supervisors
- Single-screen garage detail actions to reduce click count and handoff friction
- Customer communication workflows to align pickup timing and reduce wait
- Operational reporting for throughput, occupancy flow, and service quality

Ideal Deployment Environments

- Hotels and resorts with high-volume arrival windows
- Healthcare and mixed-use campuses requiring reliable handoff logging
- Event valet teams that need rapid staging and queue visibility
- Multi-podium operations coordinating shared inventory and staffing

Business Outcomes

- Faster retrieval cycles and lower customer wait times
- More consistent shift execution with clearer status accountability
- Cleaner transaction history for dispute resolution and manager oversight
- Higher confidence in end-of-day totals and reconciliation readiness
